

**Postdoctoral/Research Associate Position in the Area of Energy Forecasting & Planning**  
**(CODE: PDF-EFP)**

We are looking for an individual with research experience broadly in the area of energy and environmental systems engineering. Individuals applying for a position in the area of energy forecasting and planning should have an interest and experience in modeling sectorial energy demand and supply or water demand and supply for the energy sector. The aim is to develop environmental footprints (GHGs, water, land) of energy demand and supply sectors for a particular jurisdiction. The individual should also have some experience working with relevant energy forecasting and planning models (e.g., LEAP, MARKAL, WEAP, and others).

The candidate is expected to carry out research on assigned project(s). The candidate will also have opportunities to develop and initiate new research activities in relevant areas and supervise junior researchers. The candidate may also have an opportunity to teach relevant courses in the Department of Mechanical Engineering based on their background.

The successful candidate will have the opportunity to join an active group of researchers in the area of energy and environmental systems engineering supported by industry and government. The position is initially for two years and has the possibility of extension. The remuneration will be commensurate with qualifications. The position is available immediately, and the applications will be reviewed as received. Due to the high volume of applicants, only those of interest will be contacted by our office.

**Desired Qualifications:** The candidate should have a PhD in a relevant engineering discipline with an emphasis in the above-mentioned areas.

Please include the relevant code **PDF-EFP** in your application. Interested candidates should send their curriculum vitae and the names of three references by e-mail to:

Dr. Amit Kumar  
Professor,  
NSERC/Cenovus/Alberta Innovates Associate Industrial Research Chair  
in Energy and Environmental Engineering,  
Cenovus Energy Endowed Chair in Environmental Engineering,  
Deputy Director – Future Energy Systems,  
Department of Mechanical Engineering  
University of Alberta  
Edmonton, Alberta  
Canada T6G 2G8
